

I am writting this comment to let you know how important Air 1 is to me and the community. This station is a positive influence to whoever hears it. They only play music that can uplift a person and not bring them down, they also teach people to look for the good in people and not the bad. This station has been there for me when I needed an uplifting and I hope that it is around for other people to receive the same thing and even more. Please don't take away my lifeline.+
